

BOMELI

PROFESSIONAL

LASH COLLECTION

For every application. For everyday care.

Professional lash adhesives & care

CORE / SPEED / LED / CARE

A Korean-manufactured lash product collection
For salons, academies and beauty distributors

BOMELI PROFESSIONAL

Understand the difference. Find the formula for your work.

BOMELI connects professional lash application with everyday care. Working with a manufacturing partner in Korea, we organise our collection around adhesive setting speed, viscosity and the purpose of each care product.

CORE

Balanced working-speed adhesive

SPEED

Fast-setting professional adhesives

LED

LED lamp-curing options

CARE

Serum, coating and cleansing

PRODUCT SUPPLY FOR PARTNERS

BOMELI products or your label: from 50 units per product.
Product selection, quantity-based quotations and export enquiries.

Our collection. Your own brand.

Choose the supply route that fits your business.

BOMELI COLLECTION

Order the BOMELI collection in our standard bottles and labels for salon retail and wholesale distribution.

YOUR BRAND

Apply your logo and sticker label to standard bottles and caps. Own-label orders start at 50 units per product.

50 EA / PRODUCT

For standard packaging. Customer-label printing is charged separately.
Orders of 100 or more units per product are recommended.

Images show BOMELI packaging concepts. Own-label orders use the customer label; printing and label-application scope are stated in the quotation.

CORE · A balanced working pace

BOMELI signature adhesive selection

SIGNATURE SELECTION

A balanced formula for your workflow

A 2-4 second setting option for intermediate and experienced artists who prefer a more measured pace than ultra-fast formulas.

SETTING

2-4 sec

VISCOSITY

130 CPS

ARTIST LEVEL

Intermediate+

RECOMMENDED FOR

Applications that benefit from time to position the extension and a steady working rhythm. Compare CORE with our SPEED options to choose a setting window that suits your technique.

Two options for fast application

The same stated setting speed, with a clear formula option.

SPEED

For experienced artists working at pace

A low-viscosity, 0.5-1 second setting formula for professional artists with a fast application rhythm.

0.5-1 sec / 105 CPS

CLEAR SPEED

Fast application with a clear formula

A clear choice for fast application. Consider this option when you prefer clear adhesive for coloured or brown lash work.

0.5-1 sec / 105 CPS / Clear

For professional application. Setting speed can vary with the working environment and amount used.

LED curing · Clear and black

Two featured options for LED lamp-curing workflows.

LED CLEAR

Clear LED adhesive

A clear LED adhesive with 100 CPS viscosity. Use with the recommended lamp specifications and product instructions.

LED cure 1 sec / 100 CPS

LED BLACK

Black LED adhesive

A black LED adhesive with 110 CPS viscosity. An option for professional artists who prefer a black formula.

LED cure 2 sec / 110 CPS

Confirm the wavelength, output, distance and compatible lamp for each product when ordering. Curing times are stated specifications and may vary with use conditions.

Daily care · Choose your applicator

Two applicators for different application preferences.

LASH SERUM

Spoolie · Along the lashes

A spoolie format for brushing the product along the lashes. Designed for customers who prefer a comb-through application.

Spoolie applicator / 10 ml

LASH SERUM

Fine brush · Precise application

A slender fine-brush format for precise application along the lash line. Avoid contact with the inner eye.

Fine-brush applicator / 10 ml

Follow the product instructions and avoid direct eye contact. Specify the applicator type when ordering.

Care beyond the salon

The BOMELI CARE selection of serum, coating and cleansing products.

BLACK SERUM

Spoolie serum option • 10 ml

Black packaging with a spoolie applicator. Compare with the standard serum during product selection.

LASH COATING CLEAR

Lash coating product • 10 ml

A clear lash coating option for salons and distributors seeking post-application care products.

LASH CLEANSER

Lash cleansing product • 60 ml

A foam-format cleanser for the lash area. Add it to a salon retail home-care selection.

Application products and home-care products serve different purposes. Provide the relevant product instructions to your customers.

Preparation and removal

A complementary collection for professional lash application.

PREP

Unscented lash primer

An unscented option for the lash preparation stage. Include a preparation product alongside your adhesive selection.

15 g

CREAM REMOVER

Cream-format remover

A cream-format product for lash extension removal. For use by trained professionals, following the product instructions and avoiding direct eye contact.

10 / 20 / 30 g

Additional options: clear and pink gel remover 15 g, bonding booster 15 g, and super bonder 15 ml. Compatibility and application sequence are product-specific.

Find your adhesive

Compare working speed, formula and curing method.

Product	Setting / cure	CPS	Method / formula	Recommended work
CORE	2-4 sec	130	Ambient	Measured working pace
SPEED	0.5-1 sec	105	Ambient	Fast experienced work
CLEAR SPEED	0.5-1 sec	105	Ambient / clear	Fast clear formula
LED CLEAR	1 sec	100	LED / clear	Clear LED workflow
LED BLACK	2 sec	110	LED / black	Black LED workflow

TELL US ABOUT YOUR WORK

Current adhesive, preferred working speed, temperature and humidity.
Ambient or LED curing method, and target order quantity.

BOMELI can help with product selection and sample enquiries.

The table compares ambient setting times for conventional formulas and lamp-curing times for LED formulas. Consider environment, artist experience and lamp conditions.

Custom packaging & ODM

Define the project, from label changes to separate development.

01 Standard bottle + your label

From 50 units per product. Label printing charged separately.

02 Select from bottle and cap options

Select from available samples. MOQ and quotation depend on component stock and sourcing.

03 Customer-supplied bottles and caps

MOQ is confirmed after filling, formula compatibility and closure checks.

04 New packaging or formula / ODM

Feasibility is reviewed against your brief. MOQ, development cost and timing are agreed separately.

To start: sales country, product family, quantity, logo / label artwork, and a packaging sample or drawing.

Production starts upon order. Dispatch timing depends on production, labels and packaging. The 50-unit minimum does not automatically apply to new packaging or formula development.
